Gasket Specification

Please fill out the following form in order for APS to manufacture your gasket correctly.

Type of Connection: **STANDARD FLANGE** **VALVE** (Circle One)

Flange Spec: _____ (i.e. AWWA, MSSP-44)

Nominal Size _____ Pressure Rating: _____

Actual I.D. _____ (important for the gasket to seal properly)

Flange O. D. _____

Bolt Circle: _____

Number of Bolt Holes: _____

Bolt Hole Diameter: _____ Bolt Size: _____

Flange #1 Thickness: _____ Flange #2 Thickness: _____

If flanges are not identical, you must specify both flange thicknesses for sleeve to fit properly.

Note: Insulating sleeves are designed to fit over all-threaded studs. When using shoulder bolts (bolts with shanks), the sleeve may not fit over the shoulder (shank). It may be necessary to grind the shoulder (shank) down to match the diameter of the thread.
